Door Communication and Access Control

SIP client for PC or as app

The Adatis DoorKeeper is an easy-to-use SIP client, specifically designed for visitor communication and access control.
With DoorKeeper any number of entrances equipped with Adatis TouchEntry® or FaceEntry® systems can be attended from anywhere on the network.

¬ supports any number of entrances

¬ watch-before-open operation

¬ supports SIP-video (H.264) and SIP-audio for

  lowest network load

¬ Auto-detection of entrances

¬ up to 10 clients are supported per entrance

¬ remote control of the camera (pan/tilt/zoom)

  and presets

¬ does not require a SIP-Server

DoorKeeper

client software to attend any door from anywhere in the world

DETAILS

OPERATION

After installation the Adatis DoorKeeper will run minimized in the background. Whenever a visitor rings the doorbell, the window pops up, shows video and replays audio from the door. The operator can view who is standing in front of the door and use the TALK button to speak to the visitor (push-to-talk operation). The OPEN button will operate the door opener. After a preconfigured time, the application will automatically minimize and disappear into the task bar.

A click on the camera icon will enlarge the window and show the camera controls for pan/tilt/zoom and fixed camera positions. Also the controls for ACCESS, SETTINGS and CONFIGURATION are shown in the larger window.

ENTRANCE SELECTION

All available entrances are auto-detected and listed in the ACCESS sub-window. From the list the user selects all or a subset of entrances which the user wishes to attend.
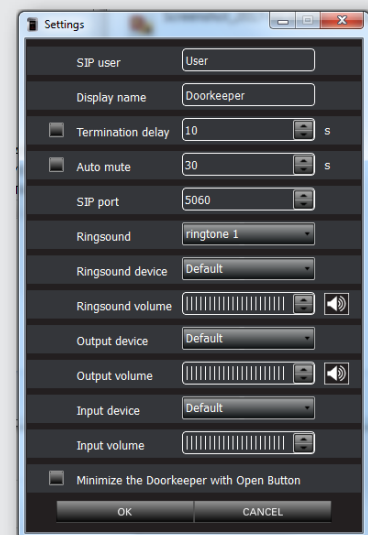

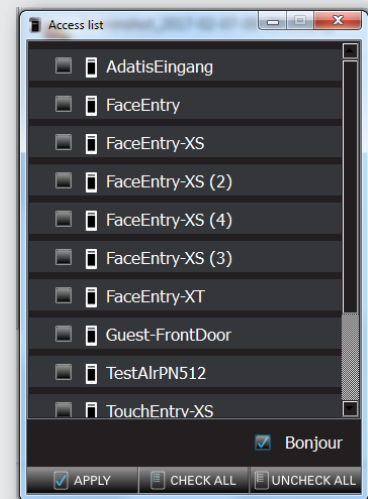

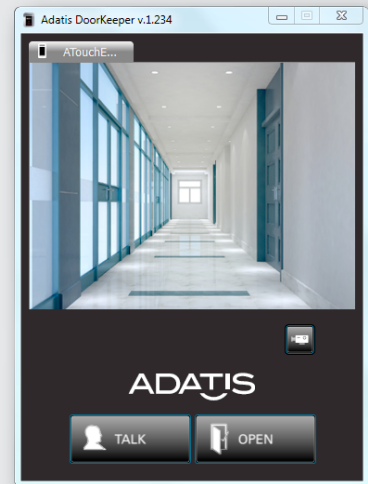

SETTINGS

The behavior of the application can be adapted to suit the user preferences. The number of seconds of time-out before the application minimizes, can be entered as well as the time before the applications automatically mutes the microphone or terminates the connection. Other settings concern the audio volume and the selection of ring-tone.

SPECIFICATIONS

- ¬ SIP 2.0
- ¬ SIP audio G.711, A/µ-law
- ¬ SIP video H.264, video formats CIF and VGA
- ¬ Auto-detection of entrances via Bonjour
